

Provider Directory

Purpose: Create one place to identify the healthcare providers and facilities connected to your medical history, what they treated you for, when you received care, and how to locate their records.

Who treated me, for what, and when? Include VA and private providers when they are part of your medical history.

Provider / Practice	Facility / Organization	Specialty / Type of Care	Condition / Reason for Care	Approx. Dates of Care	Records Status	Contact / Records Information	Notes

Records Status: Have = you possess the records; Need = you know records exist but do not have them; Requested = you have already asked for them; Unsure = you are not yet certain whether you have them.

Condition / Reason for Care: You may describe why you were seen even if no diagnosis had been made at the time. Record what was known rather than making the encounter more certain than the original record.
