

TOOL 6

Master Evidence Index

Purpose: Create a searchable map of important information you identify while reviewing your complete record, without yet sorting that information into a specific claim.

What important information have I found, and where can I find it again?

Topic / Health Issue	What the Record Documents	Evidence Type	Date	Provider / Source	Record / File Name	Page / Location	Verified?	Notes
							☐	
							☐	
							☐	
							☐	
							☐	
							☐	
							☐	

Verified: Check the box only after you personally return to the original source and confirm the entry accurately represents what the record says. **Found is not verified. Extracted is not verified. Summarized is not verified.**

Use short factual descriptions of what the source documents. Do not use this index to decide what a record proves, predict an outcome, or make the record more certain than it is.

NEXT TOOL: When you are ready to focus on one specific condition or health issue, move to 07 Condition Record Worksheet.
